

# The five innovation competencies

## Collaboration competence

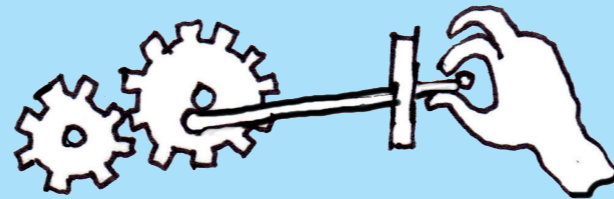

The ability to collaborate, be embracing and consciously take on different roles during the process.

- Works effectively and respectfully
- Acts flexible and helpful
- Gives and receives feedback

## Implementation competence

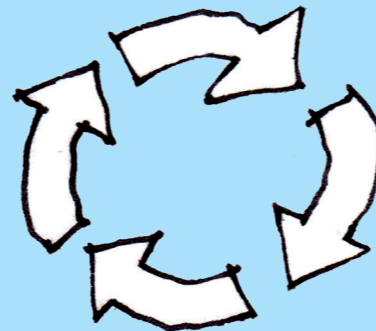

The ability to make things happen and the courage to take risks.

- Thinks and acts differently
- Accepts unsecurity
- Dares to fail

## Navigation competence

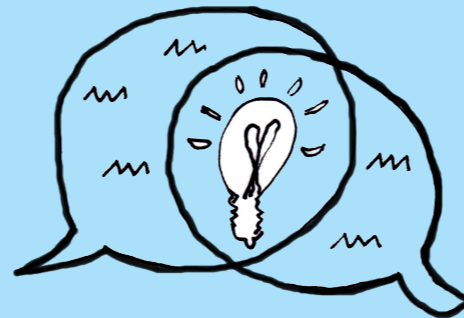

The ability to see what kind of knowledge to gather to solve a task.

- Reflects critically
- Uses processes
- Delves deeply into the matter

## Communication competence

The ability to communicate the end product in a convincing manner.

- Listens effectively
- Communicates clearly
- Formulates thoughts and ideas

## Creative competence

The ability to interpret an assignment independently, develop ideas and pick and choose the best ones.

- Explores and investigates
- Plays with different opportunities
- Connects ideas
